Summary

Junior Full-Stack Developer experienced in contributing to JavaScript and ASP.Net web applications, mobile platforms, and service management systems. Builds user-facing features, supports backend integration, and helps move concepts into working software across modern development workflows. Applies React, testing, problem-solving, strong communication, and adaptability to deliver clean, maintainable application updates

Experience

Full-Stack Development Intern

06/2026 – 09/2026

Orange Coding School

Completed an intensive full-stack internship at Orange Coding School focusing on modern web development workflows. Developed multiple website projects both independently and collaboratively, building dynamic user interfaces and backend services. The experience began with structured self-guided online learning to master core technical concepts, which were then applied through creative problem-solving to hands-on tasks and practical web development projects. Finally, completed deliverables were presented and reviewed through active technical code discussions, effective communication, and collaborative teamwork.

Frontend Development Intern

04/2026 – 06/2026

Orange

As part of my university training I interned as a frontend development intern in Orange doing hands-on web development work, where I built dynamic user interfaces and collaborated with team members to deliver practical web applications using HTML, CSS, JavaScript, and modern frontend practices.

Mendix Intern

11/2024 – 12/2024

Polaris Technology

Completed a Rapid Application Development internship at Polaris Technology, focusing on low-code solutions using Mendix. The program involved structured self-learning complemented by supervisory lectures and technical guidance, culminating in the independent design, development, and deployment of practical applications through hands-on project assignments.

Education

Bachelor of Science in Information Technology (Business IT)

10/2022 – 06/2026

*King Abdullah the Second School of Information
Technology — University of Jordan*

GPA: 3.4

Projects

VibeRent

VibeRent is a peer-to-peer luxury rental marketplace designed for evening gowns, designer dresses, and party supplies. The platform enables individuals to securely rent out their high-end wardrobe items and event decor for special occasions, promoting sustainable fashion while providing a seamless, end-to-end rental experience. Developed using ASP.NET Core MVC, C#, Entity Framework Core, and SQL Server.

Rolexyal

Developed Rolexyal, a full-stack e-commerce platform that is centered around watches and accessories. Built with ASP .Net Core MVC, C#, Entity Framework Core, and SQL Server, enabling users to browse products, manage shopping carts, and securely complete purchases.

Portfolio

Developed and maintained a responsive personal portfolio website to showcase professional experience, projects, and technical skills. Designed a custom layout and visual identity inspired by the Circassian heritage. Built using HTML and CSS for a clean, accessible user interface, and integrated with GitHub for version control and seamless deployment.

Rafeeqi

Developed "Rafeeqi," a full-stack service management platform designed to connect volunteers with disabled students requiring assistance at the university, streamlining support workflows for both participants and student administration. Built using React for a dynamic frontend and ASP.Net for robust backend services, the platform ensures a smooth and reliable user experience. It implements core features to coordinate tasks, match users effectively, and track support hours transparently across the academic community.

La7eq 7alak

A location-based Android application built using Java and Android Studio that connects local shops with customers by centralizing discounted offers in one convenient platform. The mobile app enables businesses to publish their active deals and promotions, allowing users to effortlessly explore nearby shops, discover local discounts, and find all available savings in a single place.

Skills

Technical Skills

- **Development & Programming:** C#, ASP.NET Core, PHP, JavaScript, React, HTML, CSS, Bootstrap, Java, Python, C++
- **Databases & Data Management:** SQL, Microsoft SQL Server, Entity Framework Core, Relational Database Design, Data Modeling, Normalization, Query Optimization
- **Tools & Platforms:** Git, GitHub, SQL Server Management Studio (SSMS), Visual Studio 2022, VS Code, Mendix, AWS Cloud

Soft Skills

- **Communication & Collaboration:** Cross-functional collaboration with peers and team members, technical presentation, and clear documentation.
- **Project Management & Organization:** Requirement tracking, task coordination, structured problem-solving, and time management.

Courses & Certifications

AWS Academy Cloud Foundations-AWS Academy

AWS Academy Cloud Security Foundations-AWS Academy

AWS Academy Data Engineering-AWS Academy

Volunteer

IEEE Computer Society

Directed public relations and promotional strategies for campus-focused technical workshops and events.

Circassian Charitable Society

Supported community outreach and coordinated logistics for charitable welfare programs.

ITeam JU

Collaborated on peer-led IT activities and student-centric technology events to foster a technical learning environment.
